DETAILED ACTION

Allowable Subject Matter

Claims 1-15, and 17-20 are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to independent claims 1, 5, and 12, the prior art of record fails to show or reasonably suggest the claimed invention taken as a whole with respect to the use of a removable access card that upon being coupled to an integrated television system provides a password that allows access to both a first and second programming provider.

With respect to applicant's arguments filed 12/03/2008 in the appeal brief, examiner agrees that the prior art of Knowles in view of Kim and Eyer fails to disclose replacing a password stored in temporary memory with a password received from an access card coupled to the system, as recited in independent claim 1. With respect to independent claims 5 and 12, examiner agrees that the combination of Knowles, Kim, and Eyer fails to reasonably teach a second password that is input from an access card which provides access to a first and second programming provider.

The prior art of Knowles in view of Kim and Eyer does teach a system in which a parent can block access to certain channels (which correspond to program providers). Permission to change parental locks to block the channels can be provided through the use of a password inserted by a smart-card device as taught by Kim; however a person of ordinary skill in the art at the time of the invention would not have found it obvious to combine these teachings to arrive at applicant's invention.
